Cummins® Heavy Duty Engines Lube Filter Comparison—Fleetguard® vs. Donaldson®

Fleetguard® Cummins® Heavy Duty Engines Lube Filter Comparison—Fleetguard® vs. Donaldson®
 There is no substitute for selected Fleetguard solutions with specially advanced media.

Science to Technology.
 Cummins engines are ready to meet the latest greenhouse gas and fuel efficiency standards with the release of the X15 engine model. These new engines offer better performance and fuel economy than ever before. It is a critical part of ensuring they meet this level of performance is relative to the maintenance of the engine's oil.

As engine oils have evolved to step on track with engine development, Fleetguard filters have also been working to help maintain engine life, reduce engine emissions and improve fuel economy.

Filter Media	90% Flow	95% Flow
Most popular OEM equipment	90%	90%
Complete integration with Cummins engines and Cummins best warranty	90%	90%
Industry leading combination filtration technology with glass-free media	90%	90%
A lower total cost of ownership than competitive filter offerings	90%	90%

Fleetguard LF14000N Genuine Filtration Means:

- 1 Complete integration with Cummins engines and Cummins best warranty.
- 2 Industry leading combination filtration technology with glass-free media.
- 3 A lower total cost of ownership than competitive filter offerings.

Cummins is the only engine manufacturer that also develops and manufactures filtration products. We know engines and filtration.
