

Fleetguard®

Fleetguard FF63040NN Fuel Filter

Specifically Developed to Provide Ultra High Efficiency Protection

FF63040NN is a replacement to Komatsu 600-319-3841

The best just got better.

Cummins FF63040NN Fuel Filter's new NanoNet® high-performance filtration media reduces the number of harmful particles reaching the engine's fuel injectors, resulting in reduced equipment downtime and lower Total Cost of Ownership (TCO). Its unique design delivers maximum engine life with best-in-class protection and longer filter life, minimizing your operating costs

Features and benefits.

NanoNet media is more effective at removing 4-micron particulate contaminants than the closest competitor. Other filters may remove particles but over time, they set them free. NanoNet features multi-layered architecture, giving your fuel injection system a reinforced barrier for optimal protection.

Our unique media retains captured particles during engine vibration better than any media. In fact, NanoNet fully protects injectors against the release of particles during engine vibration and fuel surge.

NanoNet is more effective at removing 4-micron particulate contaminants than the closest competitor. Our media keeps injectors cleaner and optimizes fuel atomization for more complete combustion.

NanoNet provides 30% better particle removal and retention than the competition

NanoNet...

- Reduces operating costs through extended service intervals and less engine downtime.
- Increases engine protection with our highly efficient NanoFiber media.
- Provides optimal protection that supports engine durability and equipment uptime.

GENUINE FILTRATION SOLUTION.
