

# FK13850NN Installation Tips

**Do not apply extensive downward force during installation**

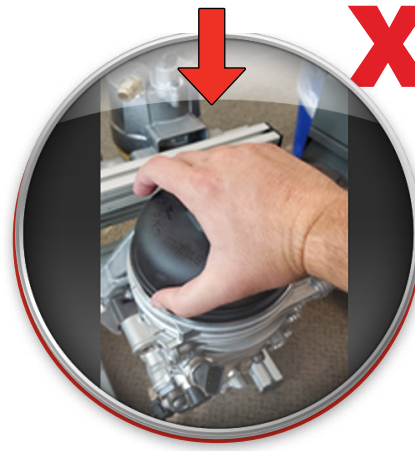

**Correct Way to Install:**

Rotate filter clockwise until pin engagement (the filter cap will drop down ~1/4")

**Incorrect Way to Install:**

Do NOT apply excessive downward force until pin engagement

**How to Properly Install Your FK13850NN Fuel Kit:**

1. Snap the cartridge into the lid and place into the housing.
2. Rotate clockwise until you feel the filter pin drop down (~1/4") into the drain port hole.
3. Do NOT apply a downward force to engage the threads UNTIL you feel the filter pin drop down into the drain port hole.
4. Tighten lid to torque specification (55 +5 Nm.)
